THE PRICE OF BREAD GOES UP.

Brothers, is the dinner-can as heavy As it was before the rise in wheat? Must the Western speculator levy

Tolls upon our bread as well as meat ? Brothers, have ye felt the pangs of hunger Since "Old Hutch" his million made

Brothers, are OUR purses growing longer Have the "corner" prices come to stay

The bakers meet and the bakers plan-To lengthen the price and to shorten the pan The Sunday that comes as a day of rest

From many a holiday robs its zest ; The price of wheat and the price of fldur Have been raised, it is said, by one man's power,

And there's naught for the bakers left. But to meet to-morrow and then agree

How the loaf shall be cut to ninke Profit enough for the Hutchinson cake-How the price shall be raised to leave A little profit for even and sleve!

Sisters, have ye heard the voice of children Sobbing in the chilly twilight gloom? What's this sound that comes, our hearts bewild'rin'

When the shades of evening fill the room Is it for some childish grief they're sighing Bitter are the tears so screly shed!

Can it be OUR children who are crying-In this land of plerty-FOR THEIR

## WHAT TO DO ABOUT IT.

The increase in the price of bread, coupled with the rise in coal and sugar, will prove a great hardship for the poor this Winter. The evil is the result of Trust combinations and gambling speculations, all of which are in conflict with public policy and ought to be suppressed by law. The Exchanges are to-day as much gam-

bling hells as any faro banks or policy shops that may be running in the city. In stocks and in produce bets are made precisely as they are made on the cards in a faro ' lay. out," or on the numbers and figures on a roulette board. The broker who operates for his customers on the market is the counterpart of the man who deals the cards from the box or spins the wheel on the board. If the laws were equally and justly enforced the Stock Exchange and the Produce Exchange would be raided by the police just as other gambling places are at intervals invaded.

Trusts are combinations of capital to raise the cost of the articles they cover to the consumer, to limit the supply and to control and monopolize the market. They are just as much conspiracies as are those radical combinations of labor to increase wages and to benefit and protect the workingman which the courts have condemned. If there were not one law for the rich and another for the poor, Trusts would be an impossibility.

If those who enforce the law, or whose duty it is to do so, would act with honesty and energy, these corner gamblers and Trust conspiracies would not have as easy a time as they now enjoy. In this State the Attorney - General is giving some trouble to the Sugar Trust, and if his example were to be followed in every State and in reference to every Trust, capital would not be so ready as it now is to embark in such conspiracies.

Mrs. Sorrenson, of Michigan, is a woman of resources. She refused to allow the laying of a railroad track past her house at Manistee and sought to drive the workmen off at the muzzle of a revolver. As the men proved to be proof against fear of a bullet, Mrs. Somerson brought out a rocking-chair, placed it across the ties, took her knitting and held the fort for a whole night and day. Of course there was no chance of tiring out a Michigas woman supplied with a rocking

chair and knitting needles. So, after fortyeight hours' delay, the fair obstructionist was carried to prison and the rails were laid.

TAKE AWAY HIS SHIELD.

Policeman McCarrier ought to be deprived of his shield. He is not a fit man for the police force. His arrest of three respectable females belonging to the Florence Mission on Bleecker street, and his insulting conduct and language, prove that he has neither discretion nor decency and that the force will be better without his services.

It is, of course, reasonable to suppose that a policeman, seeing three women talking to man on the streets after midnight, might imagine them to be immoral characters and require them to move on. But when the informed him of their business and, more over, requested one of their number to hasten back to the Mission and bring the manager to confirm their story, he ought to have awaited the result and not have roughly and with coarse language hurried all three through the public streets to the police station. Even if his prisoners had been dissolute women he had no right to needlessly

abuse and insult them. The case is one which demands the consideration of the Police Board.

Mrs. PATRICK WILLIAM O'SULLIVAN DIMPPEL has thrown up her engagement at the Jersey City Academy of Music and left the company. The manager refused to allow DIMPPEL Mari behind the scenes, and hence the trouble. Mrs. DIMPFEL has evidently considerable of the O'SULLIVAN blood in her veins. This incident shows that a society actress should not be troubled with a husband at the theatre. Mrs. POTTER and Mrs. LANGTRY bave no such difficulties.

A woman who gives her experience of a matrimonial agency says that an apparently eligible clergyman to whom she was introduced at the agency spoiled his chances by trying to borrow money from her at the time he proposed. She afterwards married an outsider, and yet the sgent demanded a twenty-dollar fee, and has been threatening to tell her new husband of her visits to th agency unless she pays up. Cannot the law reach such rascals?

There is a prospect that the Chicago street railroad strike may be settled in favor of the men. That is right. If the strike had not been a legitimate one in its object, and if the demands of the men had not been reason. able and just, it would not have received public sympathy and would not have suc-

OUR AUTOGRAPH COLLECTION.

WORLDLINGS. Miss Ella Kelly, of Hoopeston, Ill., is making an elaborate quiit of white satin, which she propose to present to the wife of the next President imme-

lately after his inauguration. A St. Louis hair-dresser says that bald-header women are far more numerous than people sus-pect, and that the tendency to lose their hair is more marked smorg society bromen than among shop girls and working women.

Mrs. Roger O. Mills has a liking for politics and keeps well posted on all the questions that come pefore Congress. She reads the papers carefully. slipping everything that might interest her busband, and frequently accompanies him on his campaign tours.

A little negro boy, thirteen years old, has been preaching before crowds in Perry County, Ga., and astonishing every one with his eloquence and his familiarity with the Scriptures. Frequently an andience of 1,500 people has listened to his dis-courses and wondered at the maturity of thought shown in his sermons.

William McCloskey, who recently went insane at Rockford, Ill., imagines that he has poisoned his mustache. Fully as odd a delusion possessed Matthew Thompson who was lately sent to the Sank County (Wis.) Insane Asylum. He had a mania for having his teeth pulled, and tried to induce dentists to extract all his teeth.

As Viewed by a Traveller.

Mr. J. Lowden Checkerly-Dittoe (of London, on his travels). -liaw! Here's another surprising thing I must make a note of. The Americans al-low only one full beard to each pair of candidates:

Notes of the Campaign. The Free Trade Club, Ninth Congressional Dis-rict, will hold a public meeting at 105 Second ave-

aue this eventng. The Young Men's Henry D. Purroy Association of the Sixteenth Asssembly District have spread a handsome transparency in front of the Club rooms, 363 First avenue.

At 260 Eighth avenue has been organized the Michael C. Murphy Independent Association of the Thirteenth Assembly District, with the following officers: William Stack, Fresident; Edwin T. Woods, Vice-Fresident; S. M. Hyde, Secretary; David Walker, Treasurer; Thomas H. Travers, Sergeant-at-Arms.

The Tammanystes of the Fourteenth Assembly District are to hotst another banner this everling. It is to be raised across the square formed by the inuction of Ninth street, Stuyvesant street and Third avenue. Mr. Percy Rockwell has arranged for streamer. for a rousing mass meeting, and eminent speakers have promised to be on hand.

Infallible Cure for a Cold.

The moment you feel that you have taken cold, of which you moke or your THROAT will quickly inform you, get a bottle of HIMER'S HAPECTORANT. As soon as you notice a dryness or irritation in the throat (it won't cold to the throat of the men in the strength of the men in the best taking the KEPECTORANT; and we guarantee that EldHY ON THEN DORES will effect a PERFECT CURE, or that the contents of one bottle will cure ANY COLD, Bottle Miness everywhere.

TOBACCO SWEATERS.

Full Exposition of the Horrors of Tenement Cigar Working.

Another Sharp Letter to the Mayor from the Central Labor Union.

Secretary Bohm Quotes Official Re ports, Statistics and Law.

The following letter has been sent Mayor Howitt:

CENTRAL LABOR UNION, Oct. 19, 1898. The Central Labor Union, representing to Sir. The Central Labor Union, representing 130 labor organizations and 100,000 wage-workers of this city, through its Corresponding Secretary in its last communication to the Mayor of New York, stated that Justice appeared "to be in danger of being intottleed by official red tape." It sees no transport to doubt this assertion, but, on the contrary, repeats it, in view of the recent letters sent in answer to its Secretary by the Mayor of New York and the President-Commissioner of the Realth Department.

of whom 5,053 were women and children under 15 years of age, ought to be halled with delight by practical politicians. There's boodle in it, and don't you forget it, noutlinstanding there may be even death in it for working people through to-bacco poisoning and for their children wallowing in it—"impairmen of growth, premature mankood and physical degradation," and later coming as a sequence, as Taylor says in his "Medical Jurisprudence;"
"Fainness, bausea, vomiting, giddiness, de-

" Paininess, nausea, vomiting, giddiness, de

prodence;

"Fainness, nausea, vomiting, giddiness, delirium, loss of power in limbs, general relaxation of the muscular system, trembling, complete protration of strength, columess of the surface with cold, clammy perspiration, convulsive movements, paralysis and death."

Ilss Honor and the Health President-Commissioner may be moroughly satisfied with their letalone policy, but not so the Central Labor Union, which now warms the Mayor of New York that if due precentions are not taken by the Board of Health that his fellow-citizens will be certain to find floating in their milest not only the Stars and Stripes at half-mast, rather than the green flag of Eris that he haises, but what is now seen in Jacksonwille—the yellow flag.

There is little hope, however, of a radical change until organized labor has something final to say to the owners of tenement-house property who lease their "awful headth-destroying and disease-infecting cesspools" to eight and other sweaters.

The Central Labor Union demands that the Police and Health Inspectors rescue the community from the talons of these brins of prey with whom humanity, as Commissioner Peck says, has little or nothing to do. In his own words. "The main and

com the talons of these birds of prey with whom immunity, as Commissioner Peck says, has little or lothing to do. In his own words, "The main and il-important question with these people seems to to get the largest nossible revenue from their violeted rookeries with the least possible outlay. Their motives, of course, are of a selfish character and should bring down upon them the censure of every human being whose soul has not been alloused. But what shall be said of the Board of leading a great cty that tolerates such a state of flairs to exist for a day?"

"As before stated there can be no reasonable ex-

trary, repeats it, in view of the recent letters sent in answer to its Secretary by the Mayor of New York and the President-Commissioner of the Health Department.

The Central Labor Union made imperative demands for justice and the panishment of wealthy the crime. That New York City has not before criminals engaged in the sweating of men, women this been swept by some infectious disease or por

TENEMENT-HOUSE CIGAR-MAKING-No. 326 E. 63d st., third floor front; room 19x14 feet, (From Labor Commissioner Peck's Report.)

and children as cigar-makers. It receives instead clap-trap sympathy and a dose of shallow excuses from your "circumicoution offices." It asked for justice, and the Mayor assumes the part of Pontius Plate and the President-Commissioner of the Health Department that of his Chief Centurion. Barabbas, the cantialist, is ascisted by official confederates to new booty, and humanity—represented by the poor tenement cigar-makers—continues to be crucified by the high priests of capitalism amid more "poverty, nunger and dirt."

We relicrate the law is amply sufficient to cover the cases sent the Health Department by Secretary Siegfried Popper at our request. The list of the tenement-houses in the Mayor's possession, where the law is hourly broken in this city and where abuses of the law can be forthwith acrested it laws now on the statute book are but into force, still awaits the action of the overpaid officials of tax-ridden New York.

Again we have to act as Corporation Counsel, President-Commissioner James C. Bayles, of the Health Department, in his letter forwarded to us by you, says that the manufacture of cigars is not only the Board of Health, but the Grand Jury for maitensioner of Labor States of the Conditions under which cigars are manufactured in the sement factories, and that not only the Board of Health, but the Grand Jury for maitensioner of this letter, requests the Mayor against the Hoard of Health.

The Central Labor Union trusts that this putch of the outset of this letter, requests the Mayor against the Mayor against the Hoard of Health.

The Central Labor Union insists that the printed evidence of the State Commissioner of Labor States of the Penal Code shall be enforced: "A person who lets or permits to be used a building the sufficient water the Mayor good of the Conditions under which cigars are manufactured in the sevence of the State Commissioner of Labor States of the Penal Code shall be enforced: "A person who lets or permits to be used for control the Mayor distribution of the Department, and

ridden New York.

Again we have to act as Corporation Counsel.

President-Commissioner James C. Bayles, of the
Health Department, in his letter forwarded to us
by you, says that the manufacture of cigars is not
"a samilary question." We insist that it is, because of the conditions under which cigars are
manufactured in the sement factories, and that
not only the Board of Health, but the Grand Jury
should take immediate action.

There can be no reasonable excuse for any offcial not doing his gaty, for our yiew of the subject ial not doing his outy, for our view of the subject

the Board of Police, section 6 (655), that orders
"Every person who shall keep fifth, urine (to
dampen leaf tobacco) or feecal matter in his apart

chal not doing his duty, for our view of the subject is corroborated by a report sent to the Legislature on Jan 21 1886, and which should ever be before our municipal authorities until the crimes of certain tobacco trade monopolists are explated in Sing Sing, Chinton or Auburn prisons.

The report referred to is that of the Bureau of Statistics of Labor of the State of New York for the year 1888. No stronger arraignment of these infamiles has ever been presented. Not only did Commissioner Chirles A. Peck trace these iniquities to the source whence they originated and the officials who were accessories, but in his wrath against eight and provided to the same shall keep filth, urine (to dampen leaf tobacco) or focal matter in his aparticular to use all keep filth, urine (to dampen leaf tobacco) or focal matter in his aparticular to use of the particular to read a nuisance shall be guilty of a misdement.

The Central Labor Union also demands that section by of the "Sanitary Code," as amended March (1886), be rigidity ut into force, as it holos tobacco under the condition that it is handled in tenement sweating factories to be a deadly poison and to come within the following clause of the law just specified, which reads: "That no person having the rigid and power to prevent the same shall kenowingly cause or permit any person to sleep or remain in any place dangerous or prejudical to

ANOTHER CIGAR-MAKING HOVEL-No. 298 E. 4th st. (From Labor Commissioner Peck's Report.)

and in order that there should be no mistake as to lacts, he had illustrations inserted in his third annual report to exhibit these damning spots just as they were, with all their degrading associations.

We refer the Mayor, President-Commissioner Bayles and the Grand Jury to them.

The Commissioner of the State Eurcaq of Statistics thus speaks of these heart-rending dedineations: "Is it not fair to assume that cothing or cigars made under such conditions are more or less unsafe to wear or smoke? On the following pages will be found woodculs, representing truthfully in outline and actual conditions, the picture of two fooms where eights are manufactured. The first is located on the third floor of the bunding No. 325 East Sixiy-third street, while the other may be seen to-day at No. 335 East Fourth street. The size of the larger of the two rooms trapersonical is, by actual measurement, 12 by la feel and that of the other one much less. In these rooms the family occupying them work, cat and sleep, and the degree of filth, want and misery in both can be better imagined than described."

The Central Labor Union likewise demands that the clear and eigher of huisances on the premises.

The Central Labor Union likewise demands that the clear and eigher of huisances on the premises.

The Central Labor Union flaving to the vacated because of the existence of nuisances on the premises.

The Central Labor Union flaving to the cannot be seeing the following pages of the clear of the two rooms frequency in the clear of the two rooms frequency in the clear of the two rooms is represented to the more of the loar of health, by actual incases, or by reason of the presence of any poisonous, noxious or offensive substance or otherwise, "The Central Labor Union ilkewise demands that the loar of Health, under section 639 of the "New York Consolidation Act," orders all the tenement with a fact of Health, under section 639 of the "New York Consolidation Act," orders all the tenement with a fact of the claim, or orders and the clear o

ly occupying them work, eat and sleep, and the degree of filth, want and misery in both can be better imagined than described.

Commissioner Peck further indorsed in every particular the statement of a "thoroughly reliable witness," who testined: "I would be in favor of a uill prohibiting the manufacture of cigars in tenement-houses, and will tell you why. I very often have to go upon roofs to recar them, where this same class of people are working in telement-houses making these class. Generally I go through the top floors to discover where the leaks come through, and the signite issee in those rooms are very sickening. I see women surrounded by flith, and children waddling in it, and they thaving sores on their hands and faces and various parts of their bodies. They can be seen even on their lips —cankerous sores; they are all the time handling this tobacco which they make into cigars, which leads me to believe that it is almost impossible to any one to smoke a cigar made by such labor as that and be free from containination."

But the Mayor and President-Commissioner

But the Mayor and President-Commissioner Bayles practically indome such a dangerous state of affairs, by asserting "that the e is no law upon the statute book which would warrant the interference of the Health Department or of the city government in reference to this system of manufacture."

Naturally any "system of manufacture," such as the exploiting of the tobacco industry and the manufacture of cigars and cigarettes amid such surroundings and with such terrible risks to the surroundings and with such terrible risks to the community might be easily expected, when prodicable to Capitalism, to have the ratification of a millionative who has piled up his similarity dollars in combination with the other coal 'and trou barons who outrageously crush the root miners of Pennsylvania, just as the cigar-sweaters do their wageslaves in New York City.

A "system of manufacture," such as that of to-bacco products, which, according to the census of 1880, made a wholesale profit in that year of \$3, 475, 505 on a capital of \$3, 585, 445 for the '50 establishments of New York City, employing 14, 476 slaves,

and in order that there should be no mistake as to | life or health, by reason of a want of ventilation o

The Central Labor Union finally demands that the Navor of New York, as its most representative

street and being a "person of full age," has the ollowing section of Chapter 4s2 of the Laws of ST, already quoted, put into action: 1857, already quoted, put into action:

"The District-Attorney of any county of this
State is hereby authorized, upon the request of the
Factory Inspector or enter of his deputies, or of
any other person of full age, to commence and
prosecute to termination, before any Recorder,
Police Justice or court of record, in the name of the
people of the State, actions or proceedings against
any person, or persons reported to him to have
violated the provisions of this act."

That portion of the Mayor's letter of the 5th inst. that refers to chapter 270 of the Laws of 1884 and relating to see "manufacture and preparation of tobacco in tenement-houses" is a plausible attempt o side-track the whole of the previous demands hade by us on behalf of Tobacco Trades Section,

io. 2. His Honor's foxy trick to misquote us by putting demands into our correspondence that we have never made, is unworthy of the Calef Magistrate of this cty. We shall endavor, however, as far as pos-sible to leave the trade in "chesinus" to the limitates, whom the Mayor delights to honor. We were as well aware as the Mayor that chapter 372 of 1884 had been declared unconstitutional, and therefore did not request him to have it carried into effect.

therefore did not request that have to be perfectly.

We nevertheless hold that have to be perfectly constitutional. We are not disposed to charge the Legislature that passed it and Gov. Grover Clevelond, who signed it, with being either knaves or tools in conceding to the people their squitable and moral demand that these infamiles should be rigidly suppressed. We are placed, however, by the Mayor in the position of assuming that the lawby all druggists. \$1; siz for \$5. Prepared HOOD & CO., Apothecaries, Lowell, Man 100 DOSES UNE DOLLAR

making power wilfully or ignorantly encumbers the statutes with acts that are not laws at all.

The decision of the Court of Appeals in the Peter Jacobs case can only be considered as an outrage on the people. The fact is that even the highest court of recourse in this state will deliberately stilling the law on behalf of capitalism in its con-

court of recourse in this State will deliberately sullify the law on behalf of capitalism in its conflict with the producers of all wealth.

It frees boodle Aldermen on trumped-up technicalities after conviction and consigns the poverty-stricken wage-slaves of the monopolisis to the lingering death that surely ensues from incotine poisoning, aided by the disgosting squaior and lack of hyzienic precautions winked at by the Board of Health, that curse the sweating factories. We regard the law quoted by the Mayor as laid down by Justice Earl and his a-sociates to be buncombe and poppycock. Their prating about "personal liberty and private property" is more suitable to the "Wizard of Wail street" and "Old Hutch" than to the custodians of the highest law of the State.

There are "personal liberty" for Sing Sing booolers and assured vested rights for the "private property" robbed from the people, granted to trusts, monopolies and capitalists. The Court of Appeals might just as well have ruled in favor of the "personal liberty" of murderers and burglars as of the bosses of the sweating horrors.

It seems to forget that the paupers evolved by capital in peace and all citizens drafted in wat time are restricted in their "personal liberty," if not consigned to death on the battle-field, with just as much unconstitutional process of law, if it be so, as we find in the bogges jurisprudence uttered

so, as we find in the bogus jurisprudence utters in the Jacobs case by these charlatan Daniels con

in the Jacoba case by these charlatan Daniels come to partisan judgment.

We have legally demanded the practical quarantine by the State of these disease-breeding and sweating factories that are as cangerous and fatal to our fellow-citizens as yellow fever or choiera. If the day should ever come that a shot-gnn policy is brought into being in New York, as it is now in Florida, to protect the bealthy from the plaguestricken in defiance of "personal liberty," the responsibility will rest upon the Albany Court of Dogberries, our millionaire Mayor, the Rip Van Winkle of the Board of li-alth and the rotten political machines of the capitalists.

Before concluding we have to advert to another point. The Mayor tells the Central Labor Union that it "must apply to the Legislature for the passage of a law on this subject, which the courts will hold to be constitutional." Organized labor did, and forced the passage of the alieged unconstitutional "Cigar Tenement-Factory law" of 1854.

Now let the Mayor try his fine Italian hand at

1884. Now let the Mayor try his fine Italian hand at lawmaking and not sak the Central Labor Union

Now let the Mayor try his fine Italian hand at lawmaking and not sak the Central Labor Umon to act for him, as fills Honor ongat to himself, in accordance with section 553, chapter 54, of the Laws of 1857, that provides:

"The Mayor and Commissioner from the Board of Health, the Commissioner of the Department of Public Works, one selegate from the lureau of the Inspection of Buildings and the Commissioner of the Department of Street-Cleaning shall meet anually, between the 18th day of November and the 30th day of December, for the purpose of considering the subject of tenement and lodging-houses in the city; and shall make such recommendations of improvement in the laws affecting tenement and lodging-houses as they may deem to be for the good of the public of the city; they shall cause such recommendations to be sent to the Governor of the State and the Senate and Assembly, annually, on or before the 15th day of January; they shall also consider the subject of the execution of said laws and shall recommend to the Board of Health such changes in the same as they may deem to be for the good of the people of the city."

If the Mayor be unable to fulfil his plain duty does he mean by his suggestion above quoted that the Central Labor Thum should recorded.

oes he mean by his suggestion above quoted that the Central Labor Union should remove from its headquarters in Clarendon Hall to the Mayor's office in the City Hall and confer with the three Commissioners and one delegate specified instead

office in the City Hall and confer with the three Commissioners and one delegate specified instead of the Mayor?

If so, the Board of Apportionment might be invited to the conference so as to appropriate sufficient of the city's funds to fix the lobby at Albany for the passage of a constitutional law, as the Central Labor Union's limited treasury is not able to compete with the millions of the tobacco sweaters.

But whatever be done to help in destroying the present condition of the social snarchy of American civilization, let it be done quickly, so that we shall not have to wait another forty years as organized labor has, since Horace Greeiey wrote in the New York Tribune of March 12, 1847:

"Christ's law of love is palpably outraged and contemned in a world of palaces and mud hovels, of famished toll and pampered uselessness, of houndless wealth, uselessly hoarded, and helpless infancy, dying in bitter agony and supplication for 'Only three grains of corn.' Let us redress the palpable wrongs before us ny prompt action."

Finally, whatever action the authorities may take, the Mayor can rest assured that the Central Labor Union is less interested in Democratic "Free Trade" or Republican 'Free Whiskey' than organized labor is in the future certainty of the 'Free Trade' or Republican 'Free Whiskey' than organized labor is in the future certainty of the world, including the United States. Yours faithfully, Corresponding Secretary, C. L. U.

STORMY TIMES EXPECTED.

The Socialists May Try to Capture the Cen-

It is said that the Socialists will make a attempt to-morrow to capture the Central Labor Union, and take some action repudiating those delegates who have taken an ac-

tive part in the present political canvass. To prevent such action the non-Socialist and conservative members have been warned to be sure and attend the meeting in Claren-don Hall at 2.30 p. m. on Sunday. A stormy time is therefore expected.

No Sympathy for the Anarchists. The Building Trades Section last night almost unanimously adopted a resolution repudiating the

action of the Central Labor Union with reference to a commemoration of the execution of the Chi-cago Anarchists.

It was decided to send out an appeal to all or-ganizations attached to the section to aid the work of the Troy Convention's Central Committee in se-curing the repeal of the conspiracy laws.

Notes in the Field of Labor. Brooklyn unions are moving vigorously to secure he amendment of the conspiracy laws. Varnishers' Union No. 1 has unanimously ndorsed James J. Coogan for the Mayoralty.

The street railways employes on the apprairy.

The street railways employes on the apprairable lines in this city, breathe freer since the reports of a settlement at Chicago reached them.

The Troy Committee proposes to see that all legislative candidates are pledged to secure the amendment of the conspiracy laws, or forfelt the support of organized labor.

Master Workman James H. Magee, of N. D. A. 26, of street railroad men, carries one of the by the Solidarity Company, a co-operative concern composed of men who lost their situations in the strike of three years ago. Division No. 1, of N, D A. 226, presented the watch to Mr. Magee as a token of its regard.

token of its regard.

A meeting of workingmen holding union cards has been called for Monday evening in Saenger Hail, 333 West Thirty-ninth street, for the purpose of organizing to secure the repeal or amendment of the conspiracy laws. Among the speakers announced are John Morrison and John McFaul, Carpet-Workers' Union; Jacob Williams, Machinists Union No. 1; Morris Hughes, Green Line Rallroad Men's Union; John Rogers, L. A. 7, 248, K. of L.; Patrick F. Glennen, Secretary of N. D. A. 256, K. of L.; Edward Conklin, Progressive Painters No. 1; Charles Brice, Gold Beaters' Union; John Moran and l'eter Mayland, Broadway and Seventh Avenne Rallroad Men's Union; John Sherlock, Gashtters' Union; George Warner, Housesmiths' Union.

This Request Is Granted,

While congratulating you on the first anniversary of your worthy paper I would ask you to kindly correct the statement which appeared in THE EVENING WORLD under date of Oct, 8, to the effect that the grand march of the Forrest Lyceum was led by Mr. Emanuel Goldberg and wife, as such was uct the case. The march was led by Mr. Emanuel Goldberg and Miss E. Leerberger. Very EMANUEL GOLDBERG truly.

Campaign

Excitement, combined with the effects of unfavorable weather, or changing season, is very liable to bring on that tired feeling which is often the forerunner of more serious troubler. It indicates that the system is giving way under too much strain, and that something is need Baraaparilla is peculiarly adapted to serve this purpose. It rouses the torpid kidneys and liver, creates a good ap-It rouses the torpid kidneys and liver, creates a good ap-petite, tones the digestive organs, purifies and vitalines the blood, cures sick headsele, and overcomes all the prostrating effects of that tired is-ling.

"For three years I suffered with dyspepsia, growing so

bad that I was completely broken down in health. I be-gan taking Hood's Sarsaparilla, and soon gained strength and appetite, and was restored to my former health. J. E. RUSSELL, Con cial Hotel, Bro h. B. If you decide to take Hood's Sarnaps of he induced to buy any other. Hood's Sarsaparilla

"LES SURPRISES DU DIVORCE."

It would have been heaping coals of fire upon the seads of those cold and prejudiced Ganla who call Shakespeare brutal because he happened to be born out of France, and who have refused to do more than merely recognize New York's omnipotent Daly because he was that undesirable quality known as a "furriner," to have permitted them to

peep in at Palmer's Theatre last night. They would have seen a large and earnest audience, containing many who probably knew little more of the French language than is contained between the covers of an Ollendorf, going wild with pleasure at the performance of a French actor, receiving his every little point with the most unounded enthusiasm, applauding him to the ecto for any of those finesses which he might have been pardoned for thinking that Paris slone could admire; in a word, showing an intelligent appreciation of art that declines to be circumscribed by any petty Feelings (with a capital F).

I don't want to take up endgels for the great and only Augustin. Not a bit of it. If there be a man on this earth capable of fighting his own battles it is he, and I would not like to deprive him of any

The performance of "Les Surprises du Divorce at Palmer's Theatre was a rare treat. It was al-

most as pleasant to watch that intelligent, ultraappreciative audience as to enjoy the comedy interpretation of Coquelin. Let all those playwrights who seem to think that New York udiences need unadulterated idlocy for an even ing's entertainment, and can appreciate nothing else, go to Palmer's Theatre any night next week. Then when they have noted the excessiveness of their error, let them walk to some convenient dock overhanging the river and drop quietly in. I could preach a nice little sermon from this ad-

mirable performance last night. Here was this great French actor appearing in a farcical comedy. and absolutely declining to be stared. He had surrounded himself with an excellent company, and every member had what is called a "show. Connelly betrayed none of that ill-repressed weariness when he was not in the centre of the stage, which is to be seen on the faces of many of our misguided stars, who imagine that an audience would sooner see the clever acting of one person that the harmonious performance of a company. He made no clap-trap pauses to secure rounds of applause. In fact, the charm of his acting lay in the fact that he seemed perfectly oblivious of the fact that there was an audience

present. Coquelin is not beautiful. In a white cap and an apron he would look a typical baker. His face in repose would be absolutely uninteresting-fat, oodgy, rublcund. But the mobility of his features simply marvellous. He expresses a whole world of meaning in his eyes. Everything he says is foreshadowed in his face. It is a study to look at him. In no other actor have I ever seen such remarkable facial—shall I say flexibility?

Coquelin's gestures are also interesting. Perhaps in Paris, where a volume of meaning is often in cluded by a shrug, these gestures may be less unusal. But by an Anglo-Saxon ancience they almost fall to be noticed. He has a curious canarylike side movement of the head that is irresistible He uses it when he wants to be particularly insinu-

It is impossible to describe the story of " Les Surprises du Divorce" without a diagram. The perpetual complications and the astoundingly ludicrous situations are not to be translated into cold type, Henri Duval is a mother-in-lawed man, Mme. Bonivard, the mother-in-law, has been a danseuse in the ballet, and as Henri says she is still coquette comme une chatte, et mauvaise. . . . He cannot endure her, and secures a divorce from Diane to be rid of her. He then marries Gabrielle, charming little lady who has a father. The father, by one of those coincidences dear to the playwright, meets Diane, Henri's divorced wife, and marries her, thus gaining the enviable Bonivard as mother-in-law. He brings this lady and Diane to visit Henri, and the situation can be imagined. The complications are so indicrous and are devised with such wonderful dexterity that the

ouse is simply kept in a roar of laughter. The play is studded with bright gems. Genuin wit scinuliates in its lines. If laughter and adiposity stand in the relation of cause and effect, what obese monsters that dispersing audience must

have contained last night. Mme. Patry gave a celightfully humorous con ception of the part of Mmc. Bonivard. That semimalicious smile of hers was a wonder; her attire mething to marvel at. The ringlets and the kiss-curls must be seen to be appreciated. As Diane, Mile. Barety, though not at all striking, did some quietly effective work. Mile. Kerwich was | 22, and a charming Gabrielle. Messrs. Duquesne, Jean

Coquelin and Dersy were all excellent. "Le Mariage est une Loterie; le Divorce, une Botte à Surprises " was the theme of the play. It was most convincingly proved. The performance will be repeated next Thursday. I shall go if I break a leg in the attempt.

He Couldn't Account For It.

WEATHER PROPHECIES, WHITECHAPEL THEORIES AND MARRIAGE LETTERS.

of Those Who Hope to Win \$100 by Forecasting the Coldest Days-Hints for London's Police-Various Theories of Whitechapel's Horror-People Still Dis-cussing the Failure or Success of

on the Editor of The Evening World:

My theory regarding the Whitechapel mystery is this : The murderer is a doctor who read that horrible story you published, "Frankenstein." The hero in the story forms a human being, and this London murderer is trying to do likewise. He takes the other parts from other animals possibly, and is munufacturing this being in secret. When his labors are finished we may discover the secret of this being in secret, when his labors are finished we may discover the secret of life which has puzzled sages from time immemorial. The individuals whom he cuts up are no loss to society, and if some one would try the same experiment in New York it would ad science and stop the disagreeable mode of living in which so many women are engaged.

A Morney

He Blust Know London Well. To the Editor of The Evening World:

In my opinion it is no South Sea Islander that is doing those wrongs in London. They that is doing those wrongs in London. They haven't got the nerve. Here is my idea of it. The murderer is or has been in, the English service, either as officer or sailor, and owing to some supposed or actual wrong, is taking this mode of revenge. You can bet he is no American. As what has already been done at his hands will clearly show, he is no stranger in London. He knows the beats of all the police officers in that section of London.

IS MARRIAGE A FAILURE?

How His Marriage Failed. Is matrimony a failure? It was decidedly so in my case. A married a girl about fourteen years ago. Everything went well for a short time. But I found out that she liked every man about as well as she liked me. Both she and her mother would go to church together, and when they came home the first together, and when they came home the first question would be by one or the other: "Did you see such a man in such a pew?" "Oh, yes, I saw him." "Wasn't he nice looking?" or "Didn't he have on nice clothes?" &c. So you can rightly see what this woman goes to church for? But though my marriage was a failure, I believe in matrimony. I do not think there is anything in this world like a good loving sensible woman. like a good, loving, sensible woman, t Christian woman, who will stand inspection

every time. When He Thinks It a Failure.

To the Editor of The Evening World; Until some means are discovered of muzzling mothers-in-law, to prevent their extemporaneous extended thirty-day quail extemporaneous extended thirty-day quantiwitticisms, and compelling babies to choose
